Description:

Detached villa consisting of cylindrical volumes that follow the natural irregularities of the land and subtly integrate with the natural environment.

Carefully designed by a leading architectural firm focused on redefining sustainability standards.

The entrance was designed with a large water element and a long, descending staircase to the entrance hall.

Floor-to-ceiling window structures with recessed profiles provide a seamless flow between the indoor and outdoor spaces and also generate plenty of natural daylight.

This **avant-garde approach ensures efficient use of natural resources and minimizes environmental impact** without sacrificing refinement and equipment.

A separate volume will be furnished with day areas, such as the kitchen, dining room, living room and an indoor spa.

An optional volume can be arranged as a guesthouse.

On the lower floor there is a wellness area, equipped with a **heated indoor swimming pool, sauna, Turkish steam bath**, separate bathroom and a fitness room.

In this section there is a home cinema, a spacious lounge area and a laundry room.

On the street side, a volume will be provided with a garage for 5+ cars.

Other features:

2 elevators. (optional 3)

Air conditioning for cooling and heating.

Underfloor heating in all rooms.

Advanced self-sufficiency technologies.

Green roofs.

Efficient irrigation systems.

Energy production for air conditioning, sanitary hot water and underfloor heating through a geothermal system.

Solar panels and accumulation batteries, which make the villa energy self-sufficient.

Thermal insulation that eliminates energy loss.
